DOJ,

The Microsoft witch-hunt has gone on long enough. This is nothing more than a scam in which states hope to obtain money without officially raising taxes.

Microsoft has already agreed to hide its IEx icon from the desktop

The case against Microsoft is just ?welfare? for Netscape and other Microsoft competitors, with not a nickel going to those supposedly harmed by Microsoft: the computer user

This is just another method for states to get free money, and a terrible precedent for the future, not only in terms of computer technology, but all sorts of innovations in the most dynamic industry the world has ever seen.

I urge you to end this debacle immediately

Mike Kasson
